D R MONIKA

QA Engineer
Bengaluru, India • drmonika197@gmail.com • +91- 9972693776

PROFESSIONAL SUMMARY

Results-driven Jr QA Engineer with 1+ year of experience in manual testing for web and mobile applications in the logistics domain. Skilled in test case design, defect tracking, API testing using Postman, and Agile methodologies. Experienced in functional, regression, and smoke testing with a focus on software quality and reliability.

WORK EXPERIENCE

Jr. QA Engineer | TestUnity
Deputed to StackBox – Logistics Domain *Feb 2025 – Present*
Bengaluru, India

- Designed and executed 700+ test cases across functional, regression, and smoke testing for web and mobile applications.
- Identified, reported, and tracked defects using ClickUp, improving issue visibility and resolution efficiency.
- Collaborated with cross-functional teams (developers, PMs) to clarify requirements, resolve ambiguities, and ensure alignment on acceptance criteria.
- Actively participated in Agile ceremonies — daily stand-ups, sprint planning, and retrospectives — ensuring QA was integrated throughout the SDLC.
- Validated end-to-end logistics workflows and UI functionality across multiple devices and browsers.

EDUCATION

Bachelor of Engineering — Industrial Engineering & Management
2019- 2023
Bangalore Institute of Technology, Bengaluru | **CGPA: 7.5 / 10**

PROJECTS

Transportation Management System
Description: Worked on a logistics-based Transportation Management System for web and mobile applications involving planning, order processing, shipment management, tendering, execution, and delivery workflows. Created and executed test cases, performed manual and API testing using Postman, tracked requirements through ClickUp, and reported defects to ensure product quality.
